Instruction to Author (2015-2019)
(www.pharmtechmedica.com)

About Journal
Pharmtechmedica (PhTechMed) is a Quarterly international journal which publishes innovative and genuine research articles, review articles, case reports, short communications in the field of Pharmaceutical sciences which includes Pharmaceutical Technology, Pharmaceutics, Biopharmaceutics, Pharmacokinetics, Pharmaceutical/Medicinal Chemistry, Computational Chemistry and Molecular Drug Design, Pharmacognosy and Phytochemistry, Pharmacology, Pharmaceutical Analysis, Pharmacy Practice, Clinical and Hospital Pharmacy, Cell Biology, Genomics and Proteomics, Pharmacogenomics, Bioinformatics and Biotechnology of Pharmaceutical Interest.

Scope of the journal
PhTechMed [ISSN: 2278-1099] allows free unlimited access to abstract and full-text. The journal focuses on rapid publication with facilities of, online research article tracking etc. Manuscripts are accepted of high quality (not previously published and not under consideration for publication in another journal) will be published without delay.

Editorial Policy
Authors should prepare their manuscripts submitted to the journal exactly according to the instructions given here. Manuscripts which do not follow the format and style of the journal may be returned to the authors for revision or rejected. The journal reserves the right to make any further formal changes and language corrections necessary in a manuscript accepted for publication so that it conforms to the formatting requirements of the journal. Manuscripts and figures are not returned to the authors, not even upon rejection of the paper

The Editorial Process
A manuscript will be reviewed for possible publication with the understanding that it is being submitted to PharmTechMedica alone at that point in time and has not been published anywhere, simultaneously submitted, or already accepted for publication elsewhere. The journal expects that authors would authorize one of them to correspond with the Journal for all matters related to the manuscript. All manuscripts received are duly acknowledged. On submission, editors review all submitted manuscripts initially for suitability for formal review. Manuscripts with insufficient originality, serious scientific or technical flaws, or lack of a significant message are rejected before proceeding for formal peer-review. Manuscripts that are unlikely to be of interest to the PhTech. readers are also liable to be rejected at this stage itself. Manuscripts that are found suitable for publication in PhTech are sent to two or more expert reviewers. During submission, the contributor is requested to provide names of two or three qualified reviewers who have had experience in the subject of the submitted manuscript. The reviewers should not be affiliated with the same institutes as the contributor/s. However, the selection of these reviewers is at the sole discretion of the editor. The journal follows a double-blind review process, wherein the reviewers and authors are unaware of each other’s identity. Every manuscript is also assigned to a member of the editorial team, who based on the comments from the reviewers takes a final decision on the manuscript. The comments and suggestions (acceptance/ rejection/ amendments in manuscript) received from reviewers are conveyed to the corresponding author. If required, the author is requested to provide a point by point response to reviewers’ comments and submit a revised version of the manuscript. This process is repeated till reviewers and editors are satisfied with the manuscript. Manuscripts accepted for publication are copy edited for grammar, punctuation, print style, and format. Page proofs are sent to the corresponding author. The corresponding author is expected to return the corrected proofs within three days. It may not be possible to incorporate corrections received after that period. The whole process of submission of the manuscript to final decision and sending and receiving proofs is completed online. To achieve faster and greater dissemination of knowledge and information, the journal publishes articles online as ‘Ahead of Print’ immediately on acceptance.

Pharmtechmedica publishes the following manuscript types:
- Original Research Articles
- Review Articles
- Short Communications

Original Research Articles

Preparation of Manuscript: The manuscript should be typed, double-spaced (except Abstract) on standard-sized – paper (8.5” x 11”) with 1” margins on all sides. Prepare the manuscript in Microsoft Word format (Version 2003) in Times New Roman font using a font size of 12. The fonts used in the text as well as graphics should be restricted to Times New Roman, Symbol and Zapf Dingbats.

The pages shall be numbers consequently. The length of Review/Science Education article should not exceed 25 manuscript pages to include figures, tables and references. These entire MS word document with graphs and illustration pasted in it shall not exceed 1 MB.

Sequence for Manuscripts Submission: A research paper typically should include the following in the order given below:

Title Page: Title should be in Title Case; the first character in each word in the title has to be capitalized. Authors and Co-Authors with their affiliations: Each author must provide their full name including their forenames and surname. The Corresponding Author
Abstract page: Not more than 300 words. Should start on a new page after the title page and should be typed in single-space to distinguish it from the Introduction. Abstracts should briefly reflect all aspects of the study, as most databases list mainly abstracts. Below the abstract should Provide 3 to 6 keywords.

Introduction: State the purpose and summarize the rationale for the study or observation.

Materials and Methods: Materials and/or subjects utilized in the study as well as the procedures undertaken to complete the work. The methods should be described in sufficient detail such that they could be repeated by a competent researcher. The sources of all major instruments and reagents used (kits, drugs, etc) must be given with parentheses. Illustrations and/or tables may be helpful in describing complex equipment or elaborate procedures. The statistical tool used to analyze the data should be mentioned. All procedures involving authentication of plant materials, experimental animals or human subjects must accompany a statement on ethical approval from appropriate authentic society and ethics committee must be produce when ask by Editorial board.

Results and Discussion: The data should be presented in a coherent sequence so that the report develops clearly and logically. The same data should not be presented in tabular and graphic forms. Please avoid unnecessary use of graphs and tables. Data should not be interpreted or discussed in results section. However, in some cases results and discussion could be combined as one section.

Conclusion: Discuss the principal conclusions drawn from the results and their important implications. Information presented under results should not be repeated. The discussion should not be unnecessarily lengthy and verbose.

Conflict of Interest: Conflicts of interest have to be declared.

Acknowledgements (if any): The source of any financial support, gifts, technical assistance and advice received for the work being published must be indicated in the Acknowledgments section.

References: Text citations should follow the Vancouver system and thus put the last name of the first author and the year of publication within parentheses unless the author’s name immediately precedes the citation

JOURNAL REFERENCES

Unknown Author: 21st century heart solution may have a sting in the tail. BMJ. 2002; 325(7357): 184-5.

Note: Plant/Micro organisms, in-vivo, in-vitro should be in italics.

Tables: Tables should be numbered with Roman numerals according to their sequence in the text, and have a short self-explanatory heading. Use SI units. Tables should include vertical rules, but horizontal rules should separate column headings from the content. Authors should keep in mind the page layout of the journal when designing tables. Tables that fit onto one printed page are preferred. Detailed explanations of symbols, units, and abbreviations should be given below the table.

Figures: Figures should be numbered consecutively with Arabic numerals (i.e. Figure 1, 2, 3 etc.). Provide a brief title with each figure. All figures should be cited in the text. -File formats accepted are Microsoft Word (figures must be a single page), PowerPoint (figures must be a single page), PNG, JPEG, TIFF, BMP, CDX (ChemDraw) or TGF (ISIS/Draw).

Appendixes (if necessary)

Abbreviations used (if necessary)

Review Articles: Should be about 15-30 pages long, contain up-to-date information, comprehensively cover relevant literature and preferably be written by scientists who have in-depth knowledge on the topic. All format requirements are same as those applicable to full papers.

Short Communication: New, interesting and rare cases can be reported. They should be unique, describing a great diagnostic or therapeutic challenge and providing a learning point for the readers. Cases with clinical significance or implications will be given priority. These communications could be of up to 1000 words (excluding Abstract and references) and should have the following headings: Abstract (unstructured), Key-words, Introduction,
Case report, Discussion, Reference, Tables and Legends in that order.
The manuscript could be of up to 1000 words (excluding references
and abstract) and could be supported with up to 10 references. Case
Reports could be authored by up to four authors.

Covering Letter: Disclose all possible conflicts of interest (e.g., funding sources for consultancies or studies of products). A brief indication of the importance of the paper to the field of Pharmacy is helpful in gaining appropriate peer review.

Copyright: Submission is a representation that the manuscript has not been published previously and is not under consideration for publication elsewhere. Once Journal has allotted manuscript number to submitted paper automatically it will be consider as copyright has given by author to journal. Further authors have to submit mandatory signed form (Available online) of transferring copyright before the manuscript published online. Download Copyright Form from http://www.pharmtechmedica.com/instruction.php and submit scan copy while submitting the Paper.

Ethical Matter: Authors publishing results from in vivo experiments involving animals or humans should state whether due permission for conduction of these experiments was obtained, from the relevant ethics committees, in the Materials and Methods section. In addition, authors wishing to publish research work involving human studies should also send a notary verified letter of approval from the Ethics Committee or the Institutional Review Board.

Manuscript Submission: Complete file should be submitted by e-mail to: pharmtechmedica@gmail.com or via online on given Link at http://www.pharmtechmedica.com/article.php

Author Checklist for Sending Proofs To Editorial Office
In order to maintain quality and consistency in PhTech. Journals, we ask you to perform the following checklist prior to submitting your final proof for publication:

1. Include the original, hard copy of Author’s Transfer of Copyright signed by each author
2. Thoroughly check the reference style as mentioned above.
3. Thoroughly check the article for correct grammar, in particular: spelling of names, affiliations, any symbols, equations, etc.
4. Provide laser printed hard copies of all figures and graphics in black and white or color (If any)
5. Submit a proof corrected with RED INK ONLY or as directed by the editor handling your manuscript.
6. Send the Corrected Proof (scanned), Copyright Transfer Form, Subscriptions (If any) with covering letter in a single envelope to the following address

Note: e-mails with the forcibly/influential consideration, multiple queries on status, vicious language, offensive writings to Editor/Associate Editors will lead to rejection of the Manuscript.
